

Dear Senators,

I am urging you to demand a full independent forensic audit of the voting machines used in the 2020 election for these nine counties:

- Macomb
- Oakland
- Wayne
- Livingston
- Kent
- Charlevoix
- Barry
- Antrim
- Grand Traverse
- 

The stunning evidence proves an algorithm changed Michigan votes, and foreign countries hacked into the Dominion machines to switch votes. This is treason, and those responsible should be held accountable.

I'm also urging you to propose a bill that will help ensure that this type of fraud can't happen again in the United States of America. The bill should contain the following:

- Ban the use of such voting machines as Dominion's
- Allow only paper ballots
- Require photo ID and proof of citizenship to vote
- Require strict signature verification on mail-in ballots
- Ban untended drop boxes

Michigan citizens are at risk of losing freedoms because of such unlawful actions by our Secretary of State who had no right to change voter laws.

Please help the citizens of Michigan and demand the audit and the bill to protect our votes.
